### **Cherishing Our Differences**

Commenting on his theme, Dr. Rogers writes, “Marriage can be one of the most rewarding and yet most challenging relationships in life. This seminar will offer Biblically based paradigms, insights, understandings, and practical encouragements on how to understand the similarities and differences that can be used to strengthen your marriage throughout the life span. The presentation will be informational, interventional, intense, and playful. The style will be both theoretical and practical. At the end of the seminar, you will better understand how gender differences, communicational differences, conflict resolution differences, personality differences and love language differences can play a role in enhancing your relationship.”
